

NG JEE CHIAN

Computer Science Student (AI) · Asia Pacific University

Petaling Jaya, Selangor, Malaysia | jeechian17@gmail.com | github.com/jeechian | [LinkedIn](#) | [Portfolio](#)

SUMMARY

Computer Science (AI) student at Asia Pacific University with hands-on experience across full-stack web development, data analytics, and machine learning. Background spans internship-based product delivery, hackathon prototyping, and independent game development. Seeking a July 2026 internship to apply strong fundamentals in software engineering and data-driven problem solving to real-world projects.

EDUCATION

Bachelor of Computer Science, specializing in Artificial Intelligence

Sep 2025 – Present

Asia Pacific University (APU)

GPA: 3.65 / 4.0 | Expected Graduation: 2027

- Coursework: Machine Learning, Data Structures & Algorithms, Database Management, Software Development Lifecycle, Multithreading & Concurrency

Diploma in Computer Science

Apr 2023 – Aug 2025

INTI International College Subang

- Studied core computer science fundamentals including object-oriented programming, data structures, and software development principles.

EXPERIENCE

Full Stack Web Developer — Internship & Part-Time

Jan 2025 – Jun 2025

BLNC Tech

- Built a web-based e-commerce client prototype (AutoLab) enabling product browsing and a complete checkout flow.
- Assisted in developing an admin dashboard for managing products, orders, and transactions.
- Continued as a part-time developer post-internship to improve features, fix bugs, and support ongoing updates.

React · JavaScript · HTML/CSS · Supabase

APU Sustainability Hackathon 2026 — Project Contributor

Mar 2026 – May 2026

Asia Pacific University (APU)

- Developed TrueFlow, a prototype web platform to verify water source quality claims.
- Demonstrated critical thinking through idea generation, impact evaluation, and feasibility analysis.

React · Node.js · Supabase

Employer Project — BYOD Policy & SETA Program

Dec 2024

IP Server One

- Collaborated to design a Bring-Your-Own-Device (BYOD) policy and a Security Education, Training & Awareness (SETA) program.
- Created awareness quizzes and proposed real-world cybersecurity solutions for the company.

Cybersecurity · BYOD · SETA

Alumni Sharing Event Speaker

Dec 2024

INTI International College Subang

- Invited by the Head of Program to share insights and experiences with Certificate in Information Technology students.

PROJECTS

Waking Demon — Game Dev

Jun 2026

2D side-scrolling action game where the player battles a beast in a forest, driven by a timed event system. Features ranged and melee combat, a rage transformation mechanic, and multiple endings.

Python · Pygame · Special Effects

TunePilot — Web App

Jun 2026

Web-based Learning Management System (LMS) for music education, providing accessible, structured online learning. Built with ASP.NET Web Forms and Microsoft SQL Server LocalDB.

ASP.NET · C# · MSSQL

TrueFlow — Web App

May 2026

Hackathon prototype web platform to verify water source quality claims, built for the APU Sustainability Hackathon 2026.

React · Node.js · Supabase · Hackathon

Data Analysis — UNSW-NB15 Network Intrusion Dataset

Jan 2026

Investigated source and destination loss statistics (SLoSS/DLoSS) to detect network attacks using statistical and machine learning techniques, including logistic regression and Apriori analysis.

R Language · Machine Learning · Data Analysis

AutoLab — Client & Admin

May 2025

Internship-built e-commerce platform: a client-facing prototype for browsing products and completing checkout, and an admin dashboard for managing products, orders, and transactions.

HTML/CSS · JavaScript · Supabase

LumberJack Blues — Game Dev (Final Year Project)

Nov 2024

2D Unity game where players chop trees, earn money, upgrade attributes, and unlock skills using custom C# mechanics.

Unity · C#

TECHNICAL SKILLS

Languages: C++, C, C#, Python, Java, R, SAS, NASM

Web Development: React, Next.js, Node.js, Tailwind CSS, JavaScript, HTML/CSS, ASP.NET

Databases: Microsoft SQL Server (MSSQL), MongoDB, Supabase

Tools & Platforms: Git, Visual Studio, PyCharm, NetBeans, Unity, Vercel, Figma

Concepts: Object-Oriented Programming, Data Structures & Algorithms, Database Management, Cybersecurity Fundamentals, Machine Learning, Data Analysis, Software Development Lifecycle, Multithreading & Concurrency

LANGUAGES SPOKEN

English, Malay, Chinese
